## Patented “Always Square” Hexagonal Profile

Our engineers mapped the grips to the contact points of the hands, collecting data used to create the hexagonal profile. This profile, present on all Rosemark Grips, allows the hands to cradle the grip naturally and assures the golfer will be able to properly control the putter, achieving the most fluid and consistent putting stroke possible.

This profile is the original featured on our Thorn series and now all Rosemark Grips

## Microfiber Silicone (MFS)

Rosemark Grips' proprietary Microfiber (MF) silicone Bead (S) material wicks away moisture while the e beads provide tackiness and enhanced tactile feel.

Carefully selected zones of the grip surface are left clear of the silicone beads to promote direct contact with the super-receptors of the fingers and thumbs.

This promotes totally unmuted feedback during ball-strike, eliminating miss-hits and improving distance control.

## Neo-Tech (NEO)

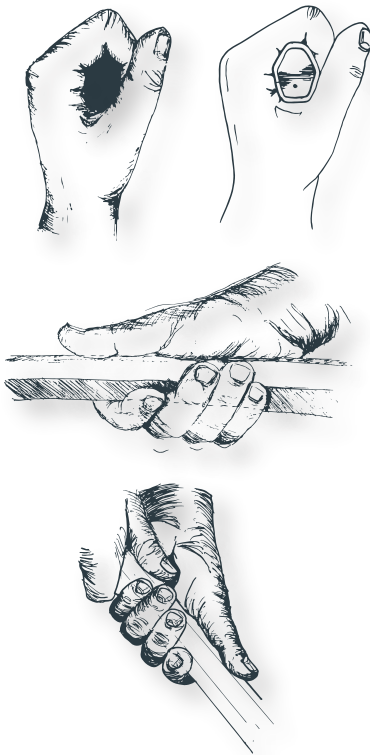

The NEO is a high-tech synthetic material with a leather like feel designed to remain super tacky in all conditions, especially cold / wet weather. Designed for golfers what experience high levels of hand sweat.

# “Fits your hand to fix your game”

TENSION-FREE PUTTING WITH GREATER CONTROL™

ROSEMARK  
GRIPS

# WIDE-TOP PISTOL 1.0 MFS

Our newest grip is a hybrid of our Wide Top and Thorn series grip. The face hemisphere is a smaller version of Wide Top and the heel hemisphere has the shape and pistol of the 1.25 Thorn grip. This grip was designed with the input of several Tour Pros both men and women. It is a light weight ( 42 grams ) grip geared towards the player who prefers a smaller profile grip but with a wider face. Our Hand Mapping Technology establishes this grip at 94% of the contact points of the hands.

# 1.52 THORN MFS

The Thorn Grip shape was the original Rosemark technology breakthrough grip developed in-house with the help of a hand surgeon to create a shape that nearly perfectly matches the shape of hands. The Thorn grip is a hexagon shape with a modest pistol and slight taper. This shape is ideal for every method of putting. Traditional, Claw, Left Hand Low, and Arm-Lock with the 7Teen grip. Our hand-mapping technology established the Thorn Series grips at -97% of the contact points of the hands.
